PROJECTS

ProShop – Ecomm Mern App

git-link

- Built an e-commerce store using:
- **express** - Server routes and controllers
- **redux** - State management
- **axios** - API calls
- **JWT** – User authentication and authorization.
- **mongoose** - CRUD operations for PRODUCT, ORDER, USER.
- **react-bootstrap** - Styling frontend
- Integrated **payment gateway** using PayPal API.
- Used **MongoDB | Express JS | React JS | Node JS** (MERN Stack) for the development of the system.

Wordle Clone

git-link

- React based web application, a game to guess a word, player gets 6 chances to guess a word, also get hints each time a guess submitted
- A word is fetched from a live data hosted with **json-server**, Logic of evaluating result is achieved by **custom-hook**, also with the use of **Hooks** (**useState, useEffect**), basic animation with keyframes is applied for input and processing to give a better look and feel.
